ontotext

One reason that drives people away from a direct application of Semantic Technology is that it is often considered too technical and hard to implement. While somewhat true (technical expertise is necessary, which we'll discuss in more detail in a future post), this is also misguided. There is simply a lack of organized, consistent resources focused on practical knowledge.

This is one challenge we want to address with Ontotext's live, online training. It is meant to help people in their understanding, both technical and non-technical, of how Semantic Technology operates so that they can put it to good use.

What you will learn

In the training, we will take a look at the broad range of advantages of SemTech such as integration of dynamic data from virtually unlimited sources, flexible data modeling, automated
