ontotext

Data can speak a universal language and this is the lingua franca of Semantic Web standards. In this presentation, you will learn about the value these standards bring to the tough task of data integration.

If you are looking for solutions that allow you not only to manage all of your data (structured, semi-structured and unstructured), but to also make the most out of them, check the slides and see the potential semantic data integration carries for piecing massive amounts of data together.

The Bounties of Semantic Data Integration for the Enterprise from **Ontotext**
